

Smartwatch for Fear Detection

AI-Powered Safety & Wellness Tracker

■ Problem Statement

Millions of individuals, including children and women, face safety risks daily. Traditional smartwatches only track health metrics but fail to detect emotional distress.

■ Our Innovative Solution

A cutting-edge smartwatch equipped with AI and biometric sensors that detects fear, sends emergency alerts, and provides real-time safety insights.

■ Unique Selling Points

■ AI-powered real-time fear detection ■ eSIM 4G LTE & WiFi for standalone connectivity ■ Cloud analytics & emergency notifications ■ Machine learning for personalized alerts ■ AI Voice Assistant for safety commands

■ Market Opportunity

With over 500 million smartwatch users worldwide, integrating AI for safety can revolutionize the industry. Targeting schools, government safety initiatives, and personal safety markets.

■ Revenue Model

Direct sales, B2B partnerships with schools and governments, and subscription-based safety features for premium services.

■ Cost & Pricing

Prototype Cost: ■7L - ■15L | Unit Manufacturing Cost: ■12,000 | Selling Price: ■18,999

■ Investment Ask

Seeking ■1 Cr for prototype development, initial manufacturing, and marketing.

■ Next Steps

■ Complete prototype within 6 months ■ Launch pilot programs with schools & governments ■ Scale production & global partnerships
